1. Objectives of FCY

The primary goal of this system is to digitize and streamline the foreign currency request management process at Gadaa Bank S.C. The FCY Operations Portal enables the bank to manage customer registrations, process foreign currency requests from importers, and facilitate a structured Maker-Checker-Approver workflow for efficient request handling and approval.

2. Scope of The Document

The key jobs that a user may perform on the system are illustrated in this document, along with the processes needed to complete each activity. This manual covers the main features available to users with different roles within the FCY Operations Portal.

3. Pre-conditions

1. For access to the system, a user must have an account.
2. To access system functionality, a user must be granted a privilege (FCY role: Maker, Checker, or Approver).
3. A user must have an active account to log in.

4. Main System Features

- 4.1. Login functionality
- 4.2. General Dashboard Statistics
- 4.3. Add/Edit/View/Deactivate/Activate Customers
- 4.4. Create/View/Edit FCY Requests
- 4.5. FCY Request Workflow
- 4.6. Manage Currencies
- 4.7. Manage Payment Methods
- 4.8. Generate Reports & Export

5. Screen Flow

5.1. System Login Screen

Simply enter your username and password to log in to the system if you already have an account and it is enabled. If not, or if you do not have an account, contact the system administrator to get one set up or have your account activated.

> **Note:** As a result of the multiple responsibilities on this system, each user will be directed to a different page depending on their function and privilege. The system uses role-based access control to determine which features are available to each user.

User Roles:

Role	Capabilities
FCY Maker	Register customers, create/edit/submit FCY requests, view reports
FCY Checker	Review requests, approve and forward to approver, or reject back to maker
FCY Approver	Final approval or rejection of requests, view reports
Admin	Manage currencies, payment methods, and all system settings

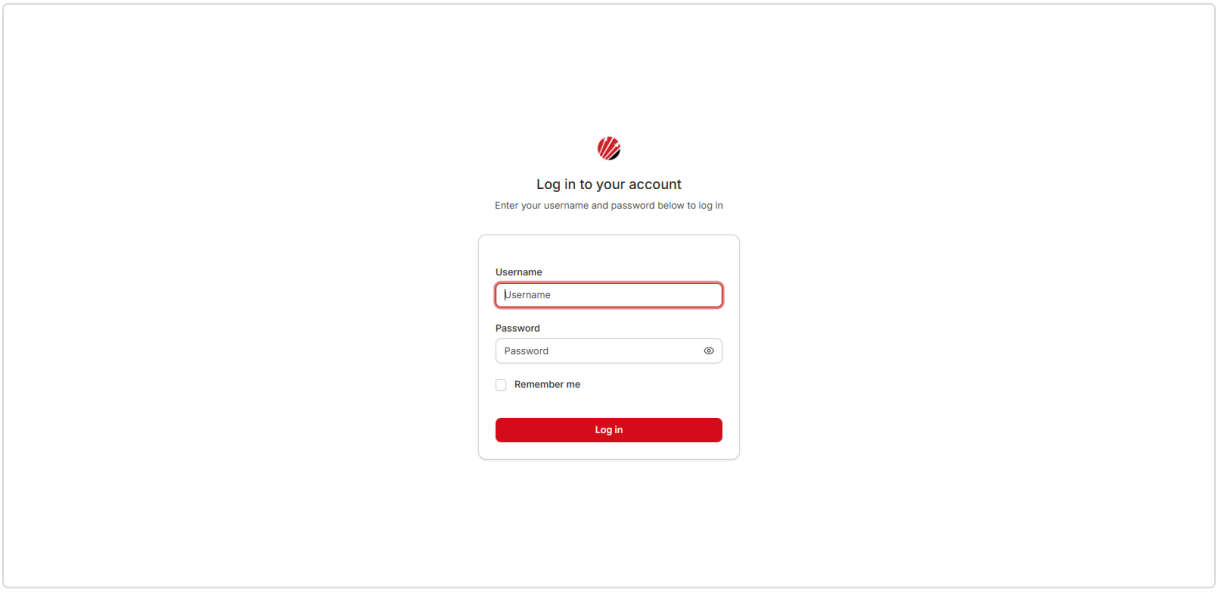

Figure 5.1: System Login Screen

5.2. General Dashboard Statistics

Upon logging in, the user is presented with a dashboard showing:

- **Total Importers** — The total number of registered customers in the system.
- **Total Requests** — The total number of FCY requests created.
- **New This Month** — The number of new customers registered in the current month.
- **Recent Registrations** — A list of the most recently registered customers.
- **Recent FCY Requests** — A list of the most recent FCY requests with their statuses.
- **Quick Actions** — Shortcut buttons to register a customer, view FCY requests, or create a new request.

> **Tip:** The dashboard provides a quick overview of the system activity. Use the "View all" links to navigate to the full lists.

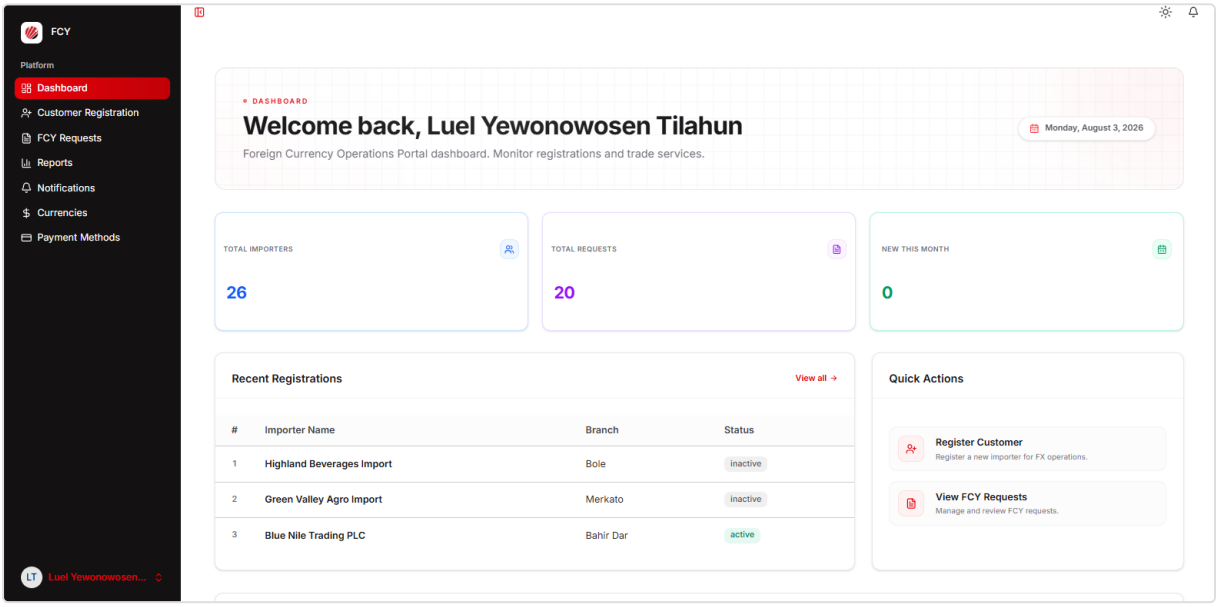

Figure 5.2: General Dashboard Statistics

5.3. Customer Registration

To register a new customer, click the "Register New Customer" button on the Customer Registry page. A dialog form will appear with the following fields:

1. **Branch of the Customer** — Select the branch from the dropdown list.
2. **Name of the Customer (Importer)** — Enter the official registered name of the importer.

4. **TIN Number** — Enter the Tax Identification Number.

To view a customer's details, click the "View" (eye icon) button. To edit a customer's information, click the "Edit" (pencil icon) button. To deactivate a customer, click the "Deactivate" button. An inactive customer can be reactivated by clicking the "Activate" (power icon) button.

> **Note:** The system checks for duplicate NBE account numbers and TIN numbers. If a duplicate is detected, a warning message will be displayed.

Customers can be filtered by:

- Search by importer name, NBE account number, or TIN number
- Filter by branch
- Filter by status (Active / Inactive)

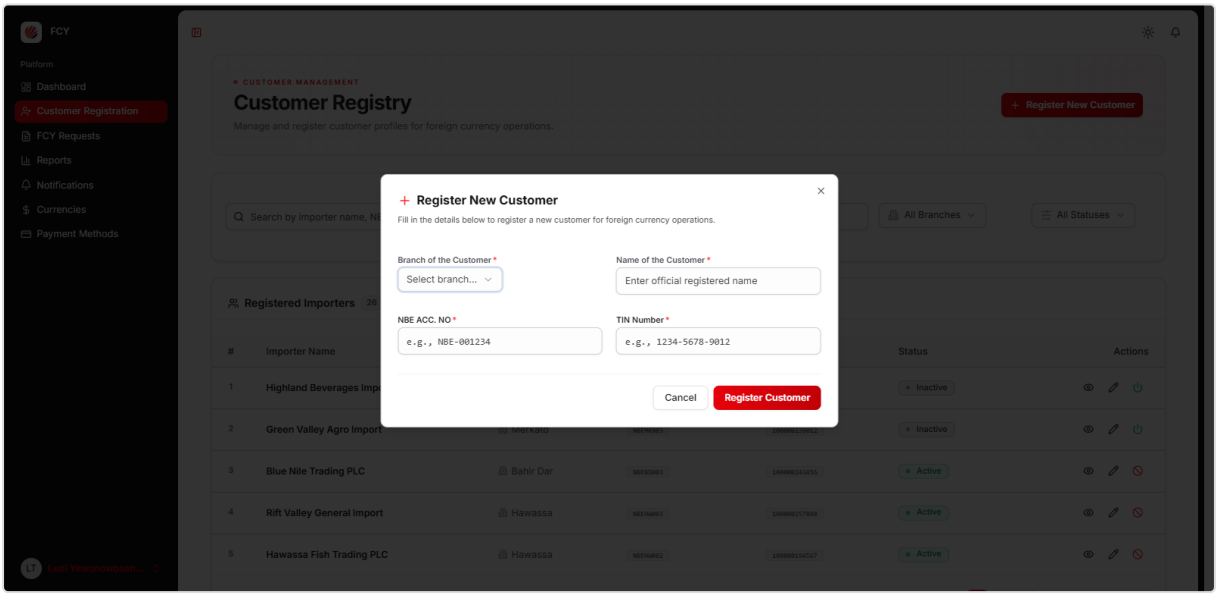

Figure 5.3: Customer Registration

5.4. FCY Request List

Select "FCY Requests" from the navigation menu to access the list of all foreign currency requests. The page displays:

- **Statistics Cards** — Total requests, pending checker, pending approver, and approved counts.
- **Search & Filter** — Search by request number, customer name, or amount. Filter by request status.
- **Requests Table** — Displays request number, customer name, currency, amount, status badge, date, and a "View" action button.

Click the "New Request" button to create a new FCY request.

> **Tip:** Use the status filter to quickly find requests that need your attention. The statistics cards at the top provide a quick summary of the current workload.

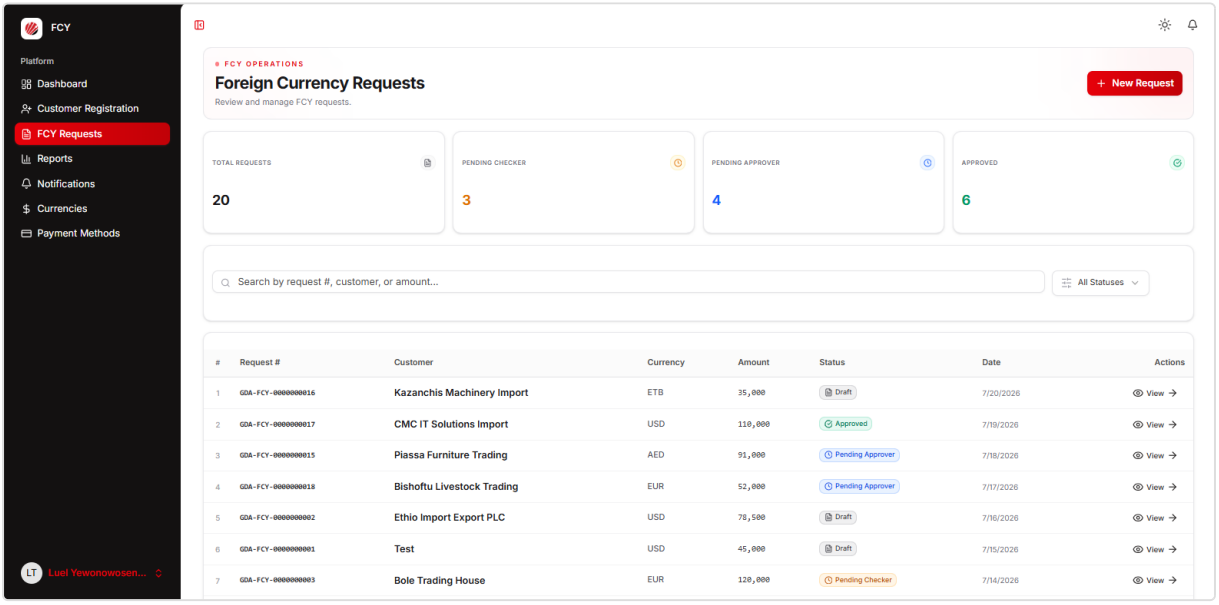

Figure 5.4: FCY Request List

5.5. Create FCY Request

Click the "New Request" button to open the FCY request creation form. The form is organized into sections:

Customer Information

- If the customer is not yet registered, click "New" to open an inline customer registration form.
- Select the supplier country from the dropdown.

Proforma Invoice

- Enter the proforma invoice number.
- Select the proforma invoice date.

Payment & Currency Details

- Select the method of payment (e.g., Letter of Credit, Telegraphic Transfer, etc.).
- Select the FCY currency (e.g., USD, EUR, GBP).
- Enter the FCY amount requested.
- Enter the total amount in USD.

Import Details

- Describe the items being imported.
- Add any optional notes.

Click "Save as Draft" to save the request. The request will be created in "Draft" status and can be submitted later.

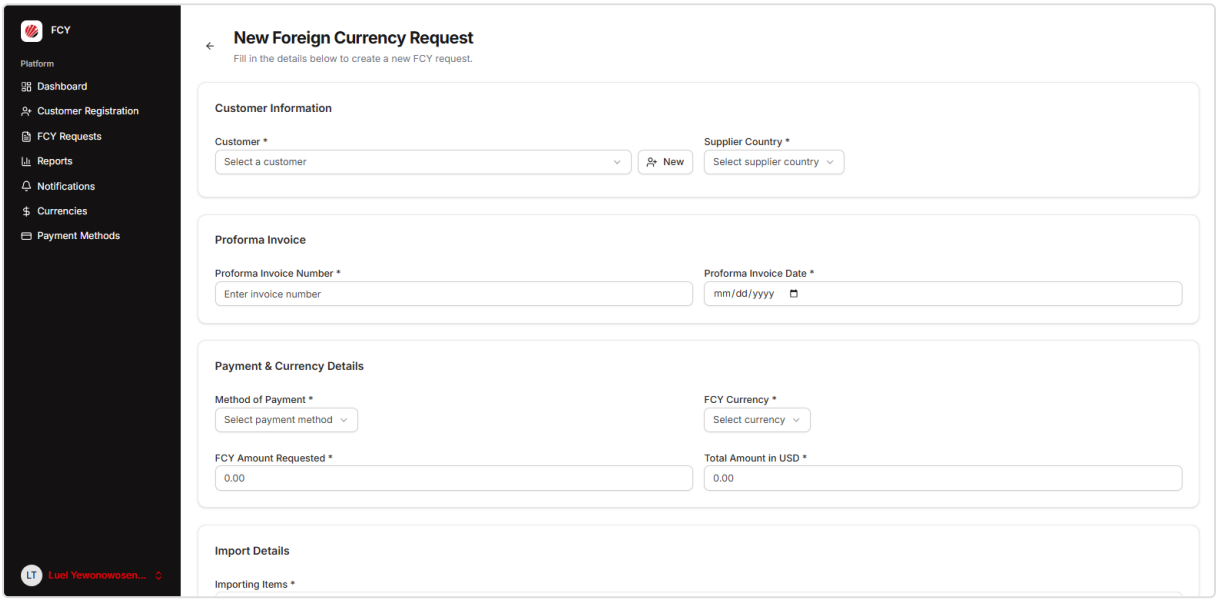

Figure 5.5: Create FCY Request

5.6. View FCY Request Details

Click the "View" button on any request in the list to see the full details. The detail page shows:

- **Request Number** — The unique identifier (e.g., GDA-FCY-0000000001).
- **Status Badge** — The current status of the request.
- **Customer Information** — Importer name, branch, NBE account number, supplier country.
- **Proforma Invoice** — Invoice number, invoice date, payment method.
- **Currency & Amount** — Currency code, FCY amount requested, total amount in USD.
- **Import Items** — Description of the items being imported.
- **Activity & Notes** — Maker notes, checker notes, and approver notes with timestamps.
- **Actions** — Workflow action buttons based on the user's role and the request status.

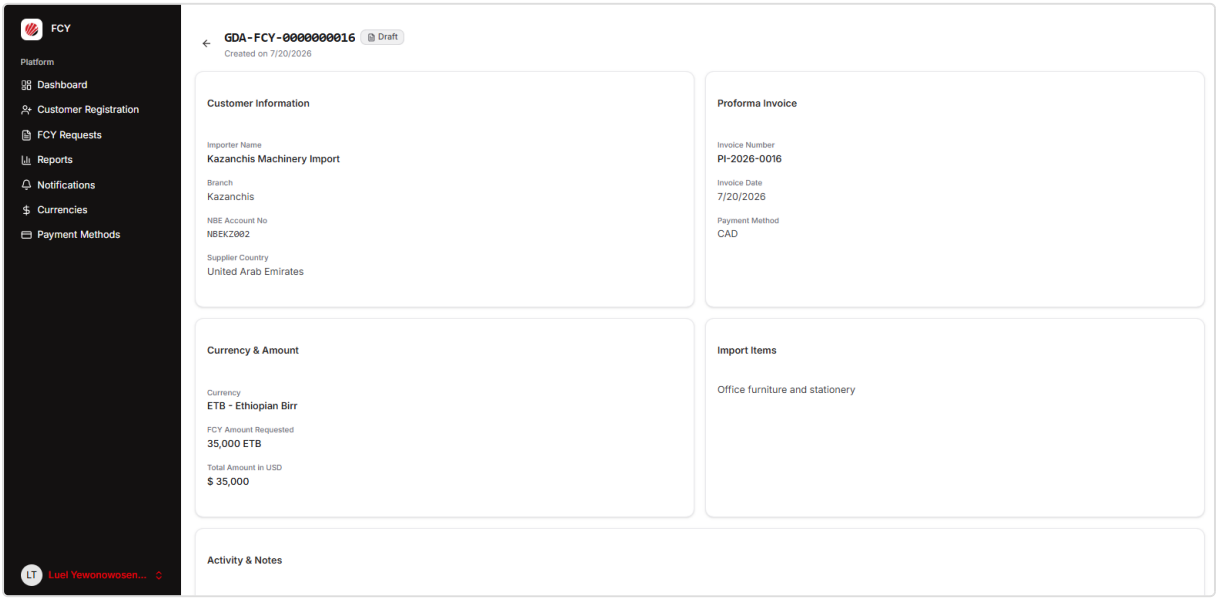

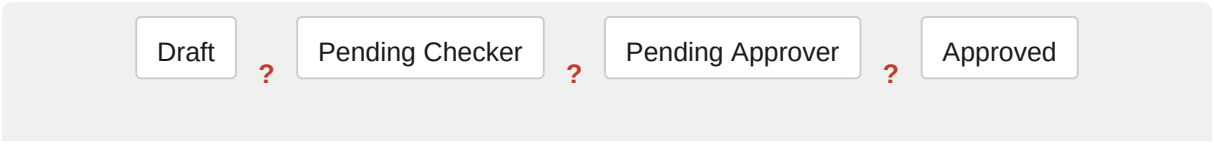

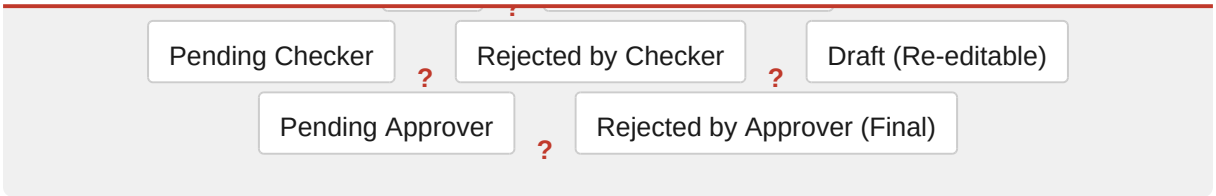

Figure 5.6: View FCY Request Details

5.7. FCY Request Workflow

The FCY system follows a three-stage approval workflow:

Workflow Steps:

1. **Maker** creates a request (status: Draft) and submits it for checking (status: Pending Checker).
2. **Checker** reviews the request. They can either:
   - Approve and forward to the approver (status: Pending Approver).
   - Reject and send back to the maker for corrections (status: Rejected by Checker).
3. **Approver** performs the final review. They can either:
   - Approve the request (status: Approved).
   - Reject the request (status: Rejected by Approver — final).

> **Note:** If a request is rejected by the checker, the maker can edit and resubmit it. If rejected by the approver, the request is final and cannot be resubmitted.

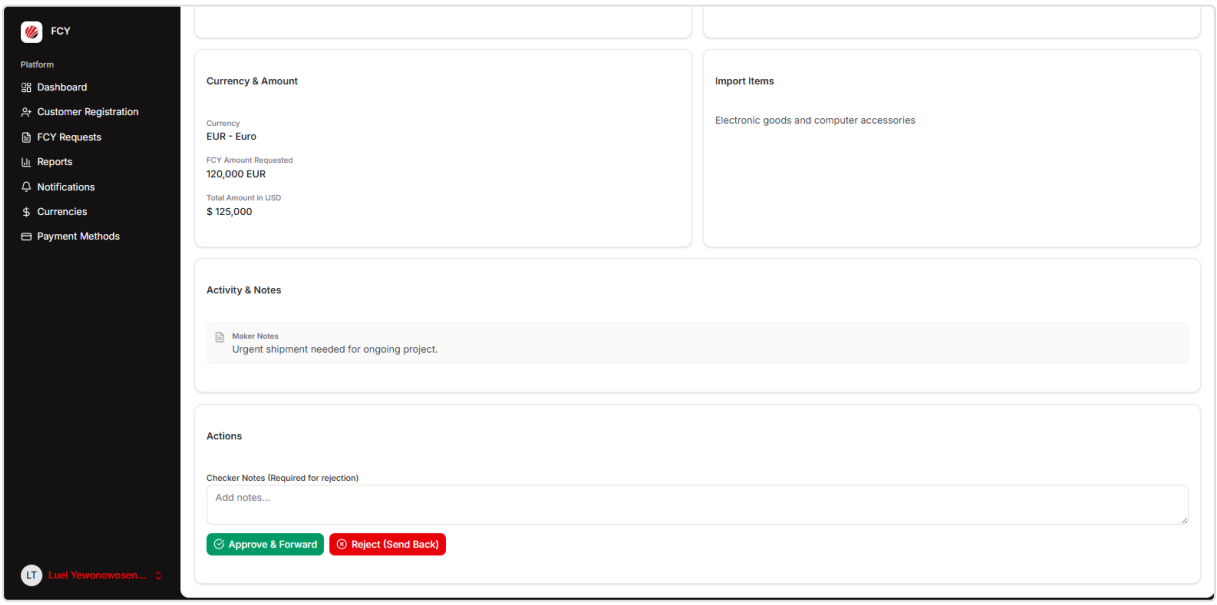

Figure 5.7: FCY Request Workflow

5.8. Edit FCY Request

A maker can edit a request only when it is in "Draft" or "Rejected by Checker" status. To edit, navigate to the request detail page and click the "Edit Request" button. The edit form is pre-populated with the existing data. Make the necessary changes and click "Update Request" to save.

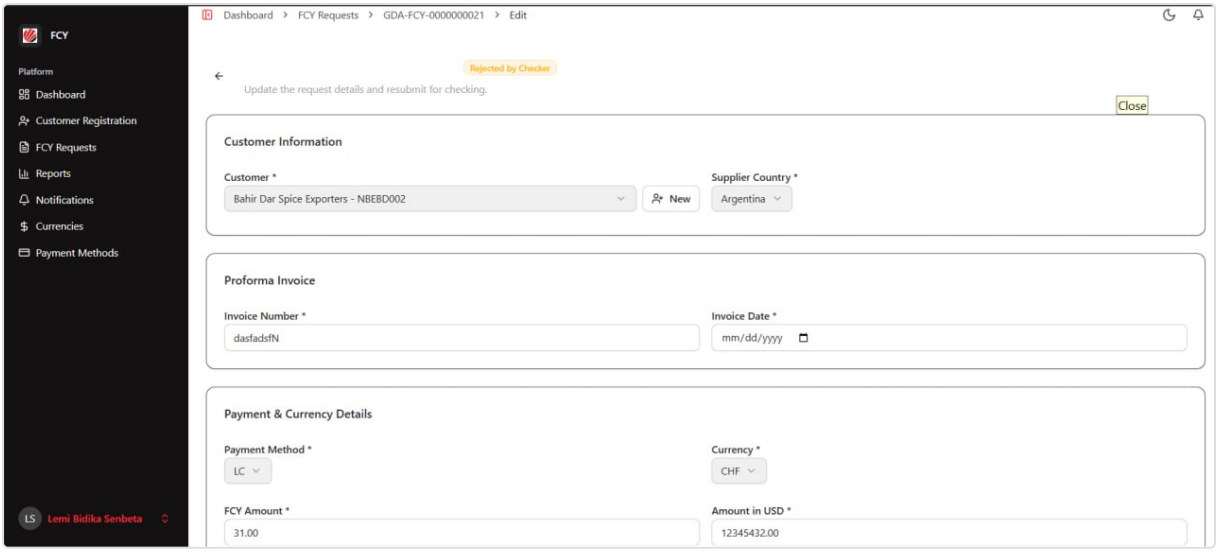

Figure 5.8: Edit FCY Request

5.9. Currency Management

To manage currencies, go to the "Settings" section and select "Currencies". From this page, you can:

- **Add a Currency** — Click "Add Currency" and enter the currency code (3-letter ISO code, e.g., USD), currency name (e.g., US Dollar), and optional symbol (e.g., $).
- **Edit a Currency** — Click the "Edit" (pencil icon) button next to any currency to modify its details.
- **Search** — Search currencies by code, name, or symbol.

> **Tip:** Currency codes must be unique and follow the ISO 4217 standard (3-letter codes).

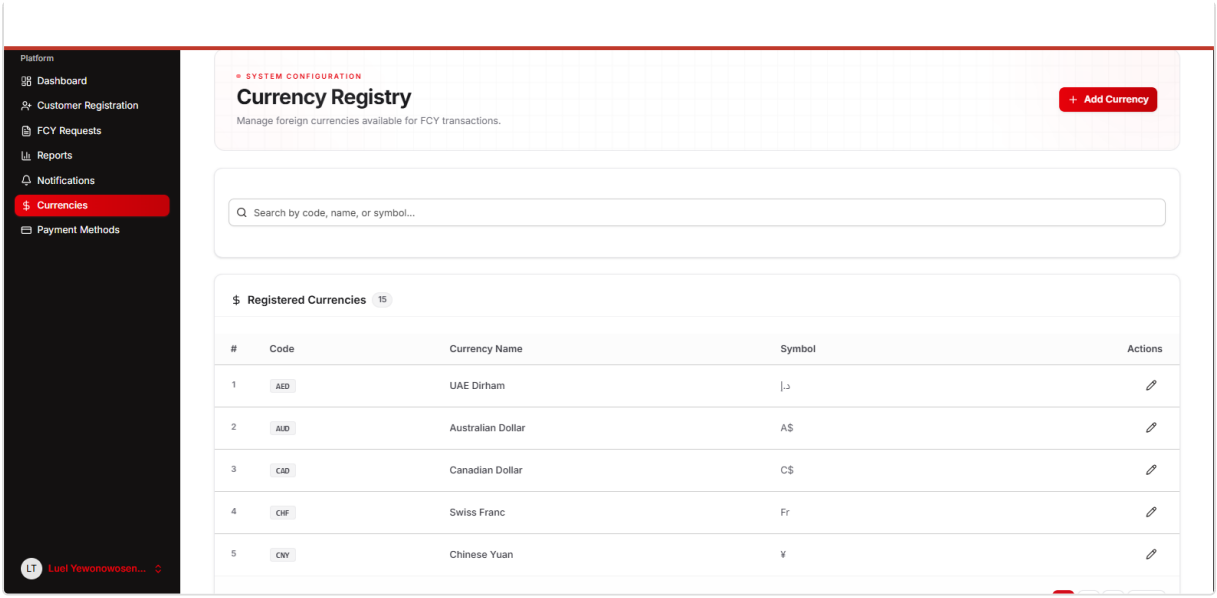

Figure 5.9: Currency Management

5.10. Payment Method Management

To manage payment methods, go to the "Settings" section and select "Payment Methods". From this page, you can:

- **Add a Payment Method** — Click "Add Payment Method" and enter the name (e.g., Letter of Credit) and an optional code (e.g., LC).
- **Edit a Payment Method** — Click the "Edit" (pencil icon) button next to any payment method to modify its details.
- **Search** — Search payment methods by name or code.

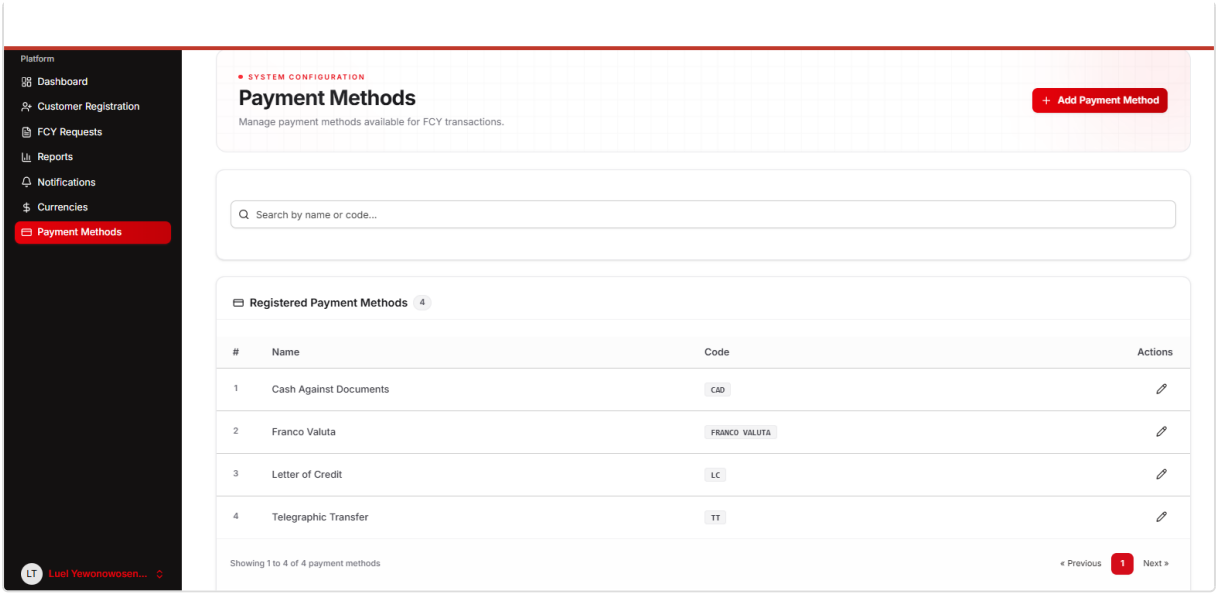

Figure 5.10: Payment Method Management

5.11. Reports & Export

Go to the "Reports" section to view and export FCY request data. The reports page provides:

- **Filters** — Filter by status, customer, currency, payment method, and date range (from/to).
- **Export Options** — Export the filtered data as CSV or Excel files.
- **Results Table** — Displays the filtered requests with request number, customer, currency, amount, status, and date.

To export, click "Export CSV" or "Export Excel". The exported file will include all columns: serial number, request number, financial year, application date, branch, importer name, NBE account number, TIN number, proforma invoice number and date, payment method, currency, FCY amount, total amount in USD, importing items, supplier country, and approval date.

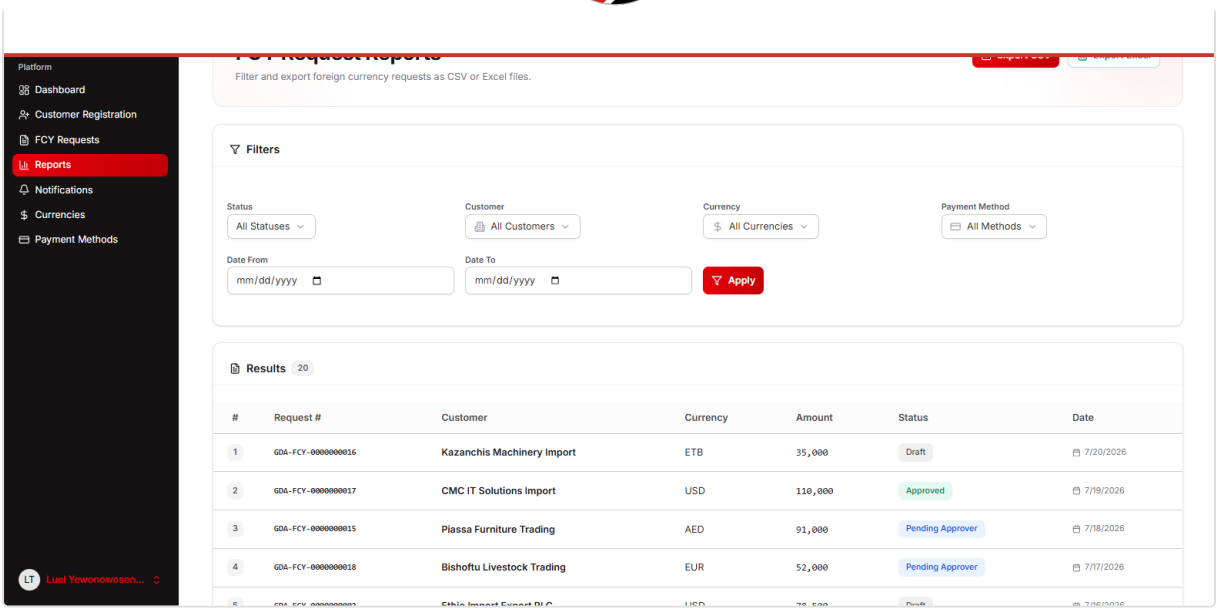

Figure 5.11: Reports and Export

5.12. Notifications

The notification system keeps users informed about important events in the FCY request workflow. Notifications are generated when:

- A new FCY request is submitted for checking.
- A request is checked and forwarded to the approver.
- A request is approved.
- A request is rejected (by checker or approver).

To view notifications, go to the "Notifications" page. From this page, you can:

- **Filter** — View "All" notifications or only "Unread" notifications.
- **Mark as Read** — Click "Mark as read" on individual notifications.
- **Mark All as Read** — Click the "Mark all as read" button to clear all unread notifications at once.

> **Tip:** The notification bell icon in the top navigation bar shows the count of unread notifications. Click it to quickly view recent notifications.
